

Matt Ruck
V.P. designDATA

Over the past 20 years, Matt has worked to continuously enhance and improve the suite of services in designDATA's managed IT services platform to provide first-class service to the designDATA community. His areas of expertise include data center initiatives, cloud computing, converged networking, VoIP telephony, contingency planning, information security and telecommunications. Matt holds a B.S. in Information Assurance from the University of Maryland, as well as Microsoft's MCSE certification, and VMware's VCP4. Matt has also served on the Technology Council for the American Society for Association Executives.
